PERFORMANCE **WITH CARE FOR THE ENVIRONMENT**

With its sophisticated and technologically advanced range of engines, Citroën is well placed to reconcile performance with low taxation levels and reduced environmental impact.

Today more than ever, this means that when choosing a Citroën vehicle you are guaranteed access to superb value for money motoring.

For example, the Citroën C3 VT, when specified with the HDi 70 Diesel manual engine produces only 99g/km of CO_2 and therefore qualifies for the A band of Vehicle Excise Duty.

COMPANY CAR BENEFIT-IN-KIND TAXATION CHARGES

The Company Car Benefit-In-Kind Taxation charge is based upon the type of fuel used, and the level of CO_2 emissions, measured in grams per kilometre (g/km). The table opposite shows the percentage of the car's list price to be taxed (P11D value†).

For example a Citroën C4 New Range BlueHDi 100 S&S manual Feel has a CO_2 emissions figure of 86g/km and the P11D figure of £17,490.

The BIK value would therefore be 14% x £17,490 = £2,448.60 (equivalent to £40.81 pcm for a 20% rate tax payer).

FUEL SCALE BENEFIT CHARGE

The taxable value of free fuel provided for private usage is linked to CO_2 emissions. The taxable benefit will be assessed using the same scale as for BIK, and the percentage applied against a set figure. For the tax year 2014/15 onwards this figure is set at £21,700

For example:
The Free Fuel benefit for Citroën C4 New Range BlueHDi 150 S&S 6-speed manual Flair would be 15% x £21,700 = £3,255.00. An individual driver would pay tax on these figures at their marginal tax rate.

More information about the Company Car Benefit-In-Kind Taxation Charges can be found on www.citroen.co.uk/fleet or by contacting Citroën Fleet Connect on 08457 940 940.
